

GREEN ROOM OUR LEARNING AUTUMN TERM 2 WEEK TWO

Last week in Green room we really enjoyed learning all about going to the moon, with the help of our story which was 'Whatever next'.

On Monday morning, we found that a box, a bear, a space helmet and some space boots had appeared in our home corner, we had so much fun letting our imaginations run wild with these props, this led to some interesting conversations about going to the moon such as; what we would need to take with us? What would we eat? How would we get there?, who would we see on the moon? We had some great discussion.

We were creative with our artwork last week. We enjoyed free painting, mixing some colours together to see what we could create. For the first time we made some sensory bags, for this we used our funky fingers to squeeze a tube of hair gel into a freezer bag, we then picked up some tiny pieces of glitter to add to the bag to create stars, very effective and a really fun activity that the children enjoyed.

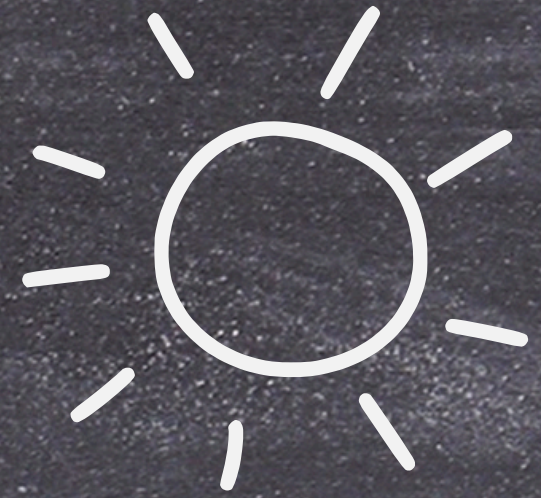

To help strengthen our fine motor skills we used some felt tip pens to colour in a space rocket, we then used some scissors to snip around the rocket, we needed to really focus and listen to instructions, which we did well.

In maths we enjoyed looking at shapes and making space rockets, we decided what shapes we needed to do this task and had a play around to see what patterns we could create. We also really enjoyed visiting Numberland, we had to pop the numbered stars into number order (just like number lane) then to complete the task we popped the correct number of buttons onto the star's number.

To end our week we made our very own jam sandwiches for a picnic on the moon, just like baby bear, we spread the jam independently onto our bread and folded it up, ready to enjoy.

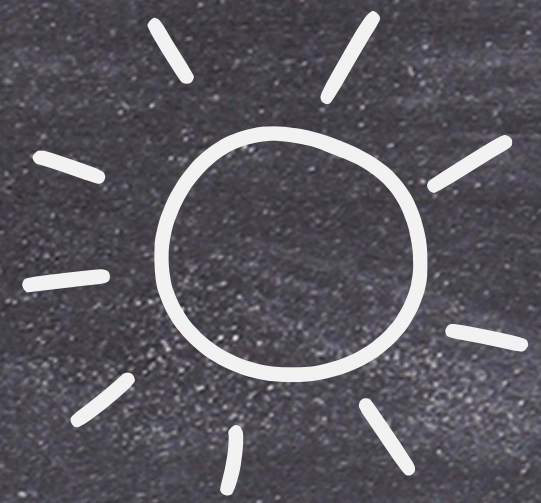

We sat on the Green rug and listened intently whilst Mrs Galton read us the story.
