

PURPLE ROOM OUR LEARNING AUTUMN 2 WEEK TWO

Last week we took a trip to the moon in our rocket after being inspired by our 'Whatever Next' text. We talked about what we would see in Space and even looked at some of the planets in the solar system. We made rockets in our construction provision and from our junk modelling resources. We enjoyed creating moon dust in our sensory trays and water trays. We created our own planets using bubble art and used our art skills to create a night sky background for our artistic moons.

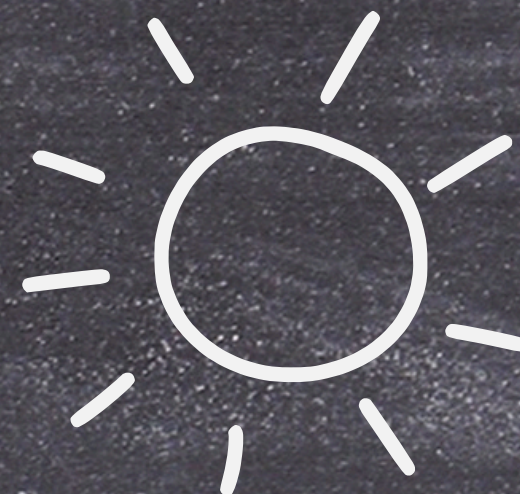

We strengthened our funky fingers by threading pipe cleaners through colanders and hole punched toilet rolls.

Last week in maths, we enjoyed visits to NumberLand. The children had to create Number Lane which are stepping stones with numbers 0-10 on them that the children have to order. Once in Number Town, we help the numbers sort the houses out for them. E.g. number two needs a house with two windows, a chimney with two bricks, a number two on the door, a shape with two sides for a garden, two flowers in the flower bed etc.

Outside the children enjoyed making space stations, using the pots and pans from the woodland kitchen as space protection gear! We also enjoyed creating an outdoor Number Lane to take us to Number Land.

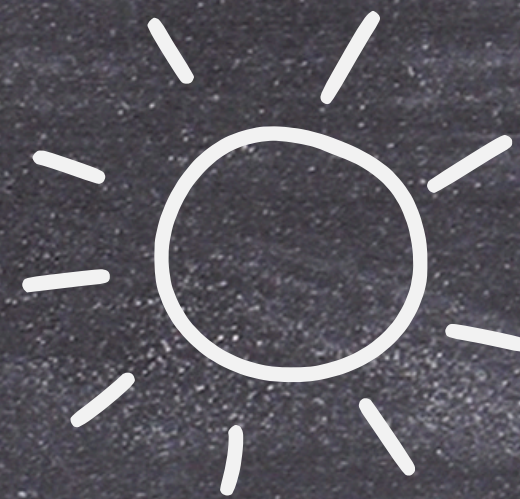

This week was super exciting as we filled our Pom-poms awards jar and enjoyed a little party to celebrate where we enjoyed games and dancing together.
